Fund Fact Sheet | September 2026

Rubrics Global Fixed Income UCITS Fund (Class F GBP)

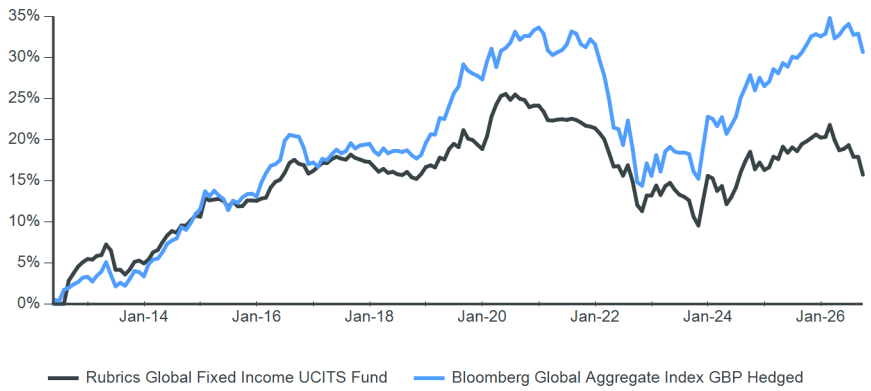
Objective

The Rubrics Global Fixed Income UCITS Fund (the "Fund") aims to maximise risk-adjusted returns by allocating across the fixed income investment universe based on a top-down macro analysis combined with a bottom-up approach to credit allocation. The investable universe includes government bonds, credit and a limited allocation to emerging markets debt.

Performance

Past performance is no guarantee of future returns. Source: Rubrics Asset Management and Bloomberg. All performance is calculated on a NAV-to-NAV basis and is as at the last business day of the month.

Cumulative performance since (24 May 2012)



Monthly performance since 2023

Risk factors you should consider before investing

The value of investments and any income derived are subject to market and exchange rate movements and may fall as well as rise. Investors may not get back the full amount invested. Investing in investment funds is subject to market risks. Past performance results are no indication of future results. Past performance results over periods of less than twelve months are an especially unreliable indicator for future returns due to the short comparison period. Any subscription fees charged by intermediaries are not included in the performance figures. All figures and information are given without any warranty and errors are reserved. Details of the fees and expenses payable to the Fund's services providers and advisors are set out in the relevant supplements to the Fund prospectus.

Fund Fact Sheet | September 2026

Rubrics Global Fixed Income UCITS Fund (Class F GBP)

Fund commentary

The Class F GBP share returned -1.84% over the month. The Fund holds 88.7% in developed-market government bonds, 9.8% in fund holdings (the Rubrics Global Credit Fund), and 0.7% in direct corporate credit. Weighted-average duration fell from 5.3 to 5.2 years over the month. Treasuries in the one- to three-year duration range account for 41% of the portfolio, with a further 40% between five and ten years. In late September the team bought long-dated Alphabet bonds maturing in 2055 and 2065, making up 0.7% of the Fund, selling 10-year US Treasuries to fund the purchase. The top ten holdings did not change. The market commentary covers the Fed, ECB, BoE and BoJ decisions in detail. Rising yields across the Treasury curve drove the loss, with the intermediate and long holdings accounting for most of the drawdown. Bund holdings lost less as euro area yields rose by less than US yields, and carry provided a partial offset.

Market commentary

Energy markets dominated September. US and Iranian forces exchanged strikes around the Strait of Hormuz in the first week, and on 10 September drones launched from Iraq hit pumping stations on Saudi Arabia's East-West pipeline, the kingdom's main export route around Hormuz. Saudi Arabia shut the pipeline the following day. WTI crude rose from $87.03 at the end of August to $103.57 on the day of the attack and peaked at $107.02 on 15 September. Prices eased through the second half of the month as ship-to-ship transfers lifted Gulf exports and Saudi Arabia restarted the pipeline on 22 September. WTI dropped on 25 September when US and Iranian negotiators met in New York to discuss reopening the Strait. WTI closed the month at $97.18. Brent rose over the month alongside WTI, though the gap between the two widened late in September on talk of a US diesel export ban; the desk holds Brent levels. US data ran hot. Payrolls rose 133k in August after a 10k fall in July, and unemployment held at 4.1%. Headline CPI rose 0.4% m/m and 3.4% y/y in August, with core CPI up 0.3% m/m and 2.4% y/y. Core PCE rose 3.0% y/y and retail sales rose 1.1% m/m. The University of Michigan survey put year-ahead inflation expectations at 4.6% in September, up from 4.0%. The Federal Reserve raised the fed funds target range by 25bps to 3.75% to 4.00% on 16 September, its first hike since July 2023, on a 12-0 vote. The median projection for end-2026 rose to 4.1% from 3.8% in June, which points to one further hike this year. Chair Kevin Warsh declined to submit a projection for the second meeting running. Treasuries sold off across the curve. The 2-year yield rose 54bps to 4.88%, the 10-year rose 54bps to 5.29% and the 30-year rose 39bps to 5.64%. On 23 September the 10-year posted its largest one-day rise since April 2025 after strong flash PMI data and a weak 5-year auction. The 10-year closed the month at its highest level since 2007, and the 30-year reached its highest level since 2002. The Bank of England held Bank Rate at 3.75% on 17 September by a 6-3 vote, with Pill, Greene and Mann voting for a rise to 4.00%. The MPC agreed a plan to run its gilt holdings down to zero by 2034, with £20bn of annual sales alongside maturities. UK CPI rose to 3.1% in August. Gilt yields rose with Treasuries, and a new 10-year gilt syndication on 29 September priced at the highest yield for that maturity since 1999. The ECB raised its deposit rate by 25bps to 2.50% on 10 September in a unanimous decision, its second hike of the cycle. Euro area inflation rose to 3.2% in August from 2.9%, with energy prices up 14.3% y/y. The 10-year Bund yield rose 24bps to 3.58% after peaking at 3.63% on 28 September, and the 2-year rose 30bps. The Bank of Japan raised its policy rate by 25bps to 1.25% on 18 September on a 7-2 vote, taking it to its highest level since 1995. Credit spreads widened in the final week as the rates sell-off and heavy supply weighed on demand. High yield issuance reached $38.5bn, the busiest month of 2026, and lower-rated credit underperformed.
